

**Question from Member of the Council  
Cabinet – 31 January 2018**

Question from Cllr Clare Sutton to the Cabinet Member for Community and Resources regarding the Fees and Charges for Non-Residential Adult Social Care

Question

If the proposed 5% increase in fees and charges for non-residential adult social care was restricted to the latest Consumer Prices Index figure of 2.7%, what would be the extra cost to DCC?

Answer

Our estimate was that the increase of 5% will generate around £300k of additional income. If this increase were restricted to 2.7% the additional income would therefore be approximately £162k, meaning the cost to Dorset County Council of limiting the increase would be £138k.
