

EXTRA ORDINARY MANAGEMENT COMMITTEE

Members of Management Committee are invited to attend this meeting at Commercial Road, Weymouth, Dorset in the to consider the items listed on the following page.

Matt Prosser
Chief Executive

Date: Tuesday, 17 January 2017
Time: 9.30 am
Venue: Council Chamber

Members of Committee:

J Cant (Chair), K Brookes (Vice-Chair), A Blackwood, F Drake, J Farquharson, C Huckle, C James, R Nowak, J Osborne and G Taylor

USEFUL INFORMATION

For more information about this agenda please telephone email kcritchel@dorset.gov.uk

This agenda and reports are also available on the Council's website at www.dorsetforyou.com/committees/ Weymouth and Portland Borough Council.

Mod.gov public app now available – Download the free public app now for your iPad, Android and Windows 8.1/10 tablet from your app store. Search for Mod.gov to access agendas/ minutes and select Dorset Councils Partnership.

Members of the public are welcome to attend this meeting with the exception of any items listed in the exempt part of this agenda.

Disabled access is available for all of the council's committee rooms. Hearing loop facilities are available. Please speak to a Democratic Services Officer for assistance in using this facility.

Recording, photographing and using social media at meetings

The council is committed to being open and transparent in the way it carries out its business whenever possible. Anyone can film, audio-record, take photographs, and use social media such as tweeting and blogging to report the meeting when it is open to the public, so long as they conform to the Council's protocol, a copy of which can be obtained from the Democratic Services Team.

A G E N D A

Page No.

1 APOLOGIES

To receive apologies for absence.

2 CODE OF CONDUCT

Members are required to comply with the requirements of the Localism Act 2011 and the Council's Code of Conduct regarding disclosable pecuniary and other interests.

- Check if there is an item of business on this agenda in which the member or other relevant person has a disclosable pecuniary or the disclosable interest.
- Check that the interest has been notified to the Monitoring Officer (in writing) and entered in the Register (if not this must be done within 28 days).
- Disclose the interest at the meeting (in accordance with the Council's Code of Conduct) and in the absence of dispensation to speak and/or vote, withdraw from any consideration of the item where appropriate. If the interest is non-pecuniary you may be able to stay in the room, take part and vote.

For further advice please contact Stuart Caundle, Monitoring Officer, in advance of the meeting.

3 PUBLIC PARTICIPATION

30 minutes will be set aside to allow members of the public to ask questions relating to the work of the Council. 3 minutes will be allowed per speaker. The order of speakers is at the discretion of the Chair and is normally taken in the order of agenda items, questions must relate to a report which is on the agenda for consideration. Notice is not required if you wish to speak at the meeting but if you require an answer to a question it is advisable to submit this in advance by contacting a member of the Democratic Services team or alternatively, by emailing kcritchel@dorset.gov.uk.

4 QUESTIONS BY COUNCILLORS

To receive questions from Councillors in accordance with procedure rule 12.

5 EXPLORING OPTIONS FOR THE FUTURE OF LOCAL GOVERNMENT IN POOLE, BOURNEMOUTH AND DORSET

5 - 54

That Members consider the draft report to Council and provide their comments.

Extra Ordinary Management Committee 17 January 2017 Exploring Options for the Future of Local Government in Poole, Bournemouth and Dorset

For Recommendation

Briefholder

Jeff Cant: Leader of the Council

Senior Leadership Team Contact:

M Prosser, Chief Executive

Report Author: Matt Prosser

Statutory Authority

The Local Government and Public Involvement in Health Act 2007 and Section 15 of the Cities and Local Government Devolution Act 2016

Purpose of Report

- 1 To invite Members to agree to make a submission to the Secretary of State for Communities and Local Government requesting the restructuring of local government in Dorset along the lines set out in the recommendations below.

Officer Recommendations

- 2 To recommend the following to Council;

That this Council agrees:

- (a) That there has been a powerful public response acknowledging a compelling case to change local government structures in Dorset.
- (b) That a submission should be made to the Secretary of State for Communities and Local Government requesting that the existing nine county, district and unitary councils should be replaced by two new unitary councils.
- (c) That based upon the weight of public opinion and the financial and other analytical evidence the two new unitary councils should be based upon the following local authority boundaries;

Unitary A: Bournemouth, Christchurch and Poole, plus the services currently provided by Dorset County Council in this area.

Unitary B: East Dorset , North Dorset, Purbeck, West Dorset, Weymouth and Portland , plus the services currently provided by Dorset County Council in this area.

- (d) That the Chief Executive be authorised, after consultation with the Leader, the brief holder for Corporate Affairs and Continuous Improvement and Group Leaders to agree the wording of the submission to the Secretary of State demonstrating our ambition for public sector transformation and drawing on the evidence that has been presented to councils, to be made along with any other council that has agreed to support the same option for reorganisation.
- (e) That the Chief Executive be authorised, after consultation with the Leader, the brief holder for Corporate Affairs and Continuous Improvement and Group Leaders to work with other councils that support the same option for reorganisation to develop and implement appropriate plans and allocate appropriate resources to progress local government change in Dorset and that a report on next steps be presented in due course.”
- (f) That subject to agreement on recommendations a) to e) above the Chief Executive, in consultation with Group Leaders, is directed to bring forward to next Full Council plans for a community governance review to explore the formation of a Town Council for Weymouth.

Reason for Decision

- 3. In order to respond to the future challenges facing local government.

Background and Reason Decision Needed

- 4. This report invites Members to consider the recommendations above which relate to the formation of two new unitary councils in Dorset to replace the existing nine councils. Members are referred to the standard report attached at appendix 1, which sets out the evidence concerning these proposals and the reasoning both in relation to the principle of reorganisation and the option being recommended. The standard report has been agreed by all the chief executives for the councils in Dorset. The recommendations presented to Members above have been varied from those in the standard report only to reflect local choice on who should be consulted under recommendation (d) and (e), and to add recommendation (f), relating to the formation of a town council for Weymouth. This latter recommendation is discussed below.
- 5. Members received a report in September on the process to explore creating a town council for Weymouth. Members are asked to refer to that report. As explained in the report, creating a new town council can be undertaken by the Borough Council.
- 6. It has always been understood that Members would need to make a decision about proposals for a town council only in the event that a

decision was made to submit a proposal to the Secretary of State requesting local government reorganisation. Should such a decision be made by Members; officers will bring a report to the next full council, inviting the Council to commence a community governance review to consider the creation of a town council. That review would follow a statutory process involving public consultation; after which the Council could choose to make an order creating a new town council.

7. A community governance review has to be completed within 12 months of being started. If a decision were made to create a town council, the Council would then have to put in place the necessary governance and financial arrangements for the new organisation to come into existence on the same day as new unitary councils (1st April 2019).
8. A contingency reserve has been identified in the draft budget for the year 2017/18, to fund a community governance review, if required. As a new organisation, the town council would derive its first year's revenue funding from the new unitary council; with subsequent years' funding coming from commercial income and precept. The transfer of assets from the Borough to a new town council would be set out in the order setting up the town council.

Implications

9. Corporate Plan

This report engages all Corporate Plan priorities.

10. Financial

The financial implications are set out in the text of the standard report.

11. Equalities

An equalities impact needs assessment is attached to this report as appendix 2 and its implications for this decision and any subsequent decisions are referred to in the standard report.

12. Environmental

No implications specifically arising from this report, although if a decision is made to proceed with local government reorganisation, subsequent decisions will have environmental implications.

13. Economic Development

No implications specifically arising from this report, although if a decision is made to proceed with local government reorganisation, subsequent decisions will have economic development implications.

14. **Human Resources**

No implications specifically arising from this report, although if a decision is made to proceed with local government reorganisation, subsequent decisions will have staffing implications.

Consultation and Engagement

A significant public consultation exercise has been carried out across Dorset, which is referenced extensively in the standard report. A summary of the consultation responses from residents in the Council's area is attached as appendix 3.

Appendices

Appendix 1: The standard report entitled Options for the Future of Local Government in Poole, Bournemouth and Dorset.

Appendix 2: The Equalities Impact Needs Assessment, referenced in the standard report.

Appendix 3: Dorset Councils – Reshaping your Councils Consultation 2016 – Weymouth & Portland Key Results.

Background Papers

The three full reports from Local Partnerships, Opinion Research Services and PWC, which are referenced by a link within the standard report.

Footnote

Issues relating to financial, environmental, economic and equalities implications have been considered and any information relevant to the decision is included within the report.

Full Council

January 2017

Exploring Options for the Future of Local Government in Poole, Bournemouth and Dorset

1. Purpose of Report

The purpose of the report is to present to Full Council the findings of the commissioned work into the exploration of options for local government in Dorset and to recommend a proposed course of action. This report has, where relevant, been considered by the Executive and Scrutiny Committees of the nine Dorset councils.

2. Recommendation

That this Council agrees:

1. That there has been a powerful public response acknowledging a compelling case to change local government structures in Dorset
2. That a submission should be made to the Secretary of State for Communities and Local Government requesting that the existing nine county, district and unitary councils should be replaced by two new unitary councils.
3. That based upon the weight of public opinion and the financial and other analytical evidence the two new unitary councils should be based upon the following local authority boundaries;

Unitary A: Bournemouth, Christchurch and Poole, plus the services currently provided by Dorset County Council in this area.

Unitary B: East Dorset , North Dorset, Purbeck, West Dorset, Weymouth and Portland , plus the services currently provided by Dorset County Council in this area.

4. That the Chief Executive be authorised, after consultation with the Leader, to agree the wording of the submission to the Secretary of State demonstrating our ambition for local government transformation and drawing on the evidence that has been presented to councils, to be made along with any other council that has agreed to support the same option for reorganisation.
5. That the Chief Executive be authorised, after consultation with the Leader, to work with other councils that support the same option for reorganisation to develop and implement appropriate plan and allocate

appropriate resources to progress local government change in Dorset and that a report on next steps be presented in due course.

3. Executive Summary

3.1 The Evidence Base

This Council together with the other principal councils in Dorset commissioned the following three key pieces of work to consider whether there is a case for changing the current structure of local government in Dorset;

- a Case for Change undertaken by PricewaterhouseCoopers LLP
- a financial analysis undertaken by Local Partnerships (joint owned by HM Treasury and the Local Government Association),
- a comprehensive public consultation undertaken by Opinion Research Services

Members from all councils received the final reports on 5 December 2016 and two presentations were made by the authors on 8 December 2016. All reports can be accessed on the Reshaping your Councils website

www.reshapingyourcouncils.uk

An extract from the executive summary from each of the reports is shown below. Members who requested hardcopy reports were given these on the 5th December 2016 and were requested to retain them.

3.1.1 PricewaterhouseCoopers LLP – The Case for Change

“Each of options 2a, 2b and 2c offer the potential to realise many of the benefits of reorganisation set out above. They also provide a much greater opportunity for transformation than option 1, as choosing any of them would allow for the creation of two entirely new unitary authorities designed to operate differently and more effectively from the outset.

While any of the options would offer some positives (though, in the case of option 2a, the positives for the conurbation authority would seem to be outweighed by the negatives for rural Dorset), some of these positive impacts could be considered to be more significant than others. The table below summarises the advantages and disadvantages of options 2a, 2b and 2c. For each disadvantage, we have included an indication as to whether we consider the impact to be ‘long term’ (and consequently relatively difficult to resolve), ‘medium term’ (more straightforward to resolve) or a ‘one-off’ issue associated with the transition (which could be resolved relatively straightforwardly).

The relative advantages and disadvantages of the options

Option	Advantages	Disadvantages	Impact
2a	<p>The administrative boundaries of the new councils would reflect Dorset's geography and the way in which it functions economically, <u>to some extent.</u></p> <p>Under this option, none of the boundaries of any of the existing councils would be retained, reinforcing the view that entirely new organisations were being created.</p>	<p>This option would result in the establishment of a rural Dorset authority too small to be viable.</p> <p>Based on the Local Partnerships analysis, this option would deliver the least equitable split of savings between the future authorities.</p> <p>Disaggregation of the county council services currently provided to residents of Christchurch and East Dorset would be required, complicating the transition process.</p>	<p>Long term</p> <p>Long term</p> <p>Transition</p>
2b	<p>The administrative boundaries of the new councils would <u>most closely</u> reflect Dorset's geography and the way in which it functions economically (accepting that entirely new boundaries are not being considered).</p> <p>Based on the Local Partnerships analysis, this option would deliver the greatest financial benefit overall.</p> <p>Under this option, none of the boundaries of any of the existing councils would be retained, reinforcing the view that entirely new organisations were being created.</p> <p>This option would deliver the most balanced division of population and electoral divisions between the two unitary authorities (based on current boundaries).</p>	<p>Disaggregation of the county council services currently provided to residents of Christchurch would be required, complicating the transition process.</p> <p>According to Local Partnerships, the forecast surplus achieved would not be distributed equally between the two new authorities.</p>	<p>Transition</p> <p>Long term</p>
2c	<p>The administrative boundaries of the new councils would reflect Dorset's geography and the way in which it functions economically, <u>to some extent.</u></p>	<p>Based on the Local Partnerships analysis, this option would achieve the least financial benefit overall.</p> <p>Under this option, because the boundaries of some of the existing</p>	<p>Long term</p> <p>Transition</p>

Option	Advantages	Disadvantages	Impact
	<p>Based on the Local Partnerships analysis, this option would deliver the most equitable split of savings between the future authorities.</p> <p>The transition process would be more straightforward as a result of not having to disaggregate the county council services currently provided to residents of Christchurch and East Dorset.</p>	<p>councils would be retained, reorganisation could be perceived as a takeover by two of the current councils.</p>	

While the relative merits of each option should all be considered during the decision making process, it is important to note, as we have indicated, that some of them might be considered more significant than others.

The evidence would suggest that the new administrative boundaries of the councils under option 2b would most closely match Dorset's geography and the way in which it functions economically.

Options 2b and 2c appear to offer a more viable case for change than option 2a, from a financial perspective (the Local Partnerships analysis indicated that option 2a would see a Small Dorset authority established which would not be viable). The Local Partnerships analysis indicates option 2b would deliver greater savings than 2c, while option 2c would deliver a more even distribution of savings than 2b. Option 2c would result in more council tax income being lost over a 20 year period than either option 2a or 2b.

Under option 2c, the fact that the boundaries of some of the existing councils would remain intact could result in reorganisation being perceived of as a takeover by some stakeholders (including some residents). Though this would be likely to complicate the transition process, and potentially require additional investment in change management, this issue could be addressed relatively straightforwardly.

Option 2b would offer a more even distribution of both the current and future populations of Dorset than either option 2a or 2c. Options 2b and 2c would see two new authorities created which would both serve populations within the DCLG suggested range. This could also be significant in terms of its implications for electoral equality. Option 2b would return the most even distribution in terms of the ratio of representatives to the electorate across the new councils. However, even if option 2a or 2c were chosen, a boundary review could be conducted to correct any imbalances in electoral equality.

Finally, while the complexity associated with disaggregating current service arrangements during transition would be a reality under either option 2a or 2b,

many organisations in other areas have resolved these sorts of issues successfully in the past.”¹

3.1.2 Opinion Research Services – The Consultation²

“The outcomes of this exercise are more consistent than is usually the case in complex statutory consultations; and the findings suggest that the restructuring of local government in Dorset is not generally a deeply controversial matter – though there are certainly some strong feelings in some areas.

Overall, across both the quantitative and deliberative means of consultation, there was clear and even emphatic support for moving to two councils.

The singular exception to that generalisation is Christchurch where the open questionnaire showed that the majority of respondents opposed reducing to two councils (54%) as well as opposed options 2a (67%), 2b (57%) and 2c (60%). However, in the more representative household survey in Christchurch support for two councils was much higher (63%) and residents also supported option 2b strongly (64%). Moreover, in Christchurch the shift from less positive to more positive views was particularly pronounced in the residents’ workshop, where nearly two-thirds of the participants ended by approving a reduction to two councils. The findings of all means of consultation are important, of course; but in this case the open questionnaire is a less than perfect guide to the balance of general public opinion across Christchurch.

In general, across all the areas of Dorset, there was an emphatic preference for option 2b as the fairest and most balanced of the three. In contrast, 2a was considered too unbalanced, unfair and unsustainable, whereas 2c was described by many as potentially creating a council that was ‘too small’.

The alternative options proposed during the consultation are interesting, but the councils will have to decide how practical some of them are; and their very diversity indicates the need to focus on clear and relevant options that will provide the desired efficiencies.

Despite the general consistency of the positive findings summarised above, the consultation does not mean that the local government in Dorset must be reformed, for the councils may have sound reasons for not proceeding. But equally, there is nothing in the consultation that should prevent them going ahead if (on the basis of all the available evidence) they are minded to do so.

¹ PricewaterhouseCoopers LLP, (2016). *Case for Change in Dorset. Local Government in Dorset Executive Summary*, pg 15

² Minor amendments to consultation report:

Paragraph 3.4: For clarification purposes in the open consultation questionnaire chapter the following text has been added “Throughout this chapter, where results are presented at the overall level, this includes all responses for geographical areas, including respondents outside of the overall Dorset area and those for whom the area is unknown”

Table 2: For clarification purposes the number of individuals who live outside of Dorset and from an unknown area has been added.

Figure 53: The net score for Dorset County Council for option 2c was incorrect. The figure was previously reported as -17, but is -23

The evidence of the consultation is that there is widespread public support for the restructuring of local government.”³

3.1.3 Local Partnerships – Dorset Councils Potential Options for Reconfiguration of local Councils 24th August 2016

“The current configuration of councils under a No Change scenario are projected to have aggregate budget gaps in each of the years from 2019/20 to 2024/25 which would require total savings of approximately £30m to be found.

There is the potential to save annually circa £36 million by the creation of one Unitary Council and circa £28 million by the creation of two unitary councils. This is achieved by avoiding duplication on the costs of management, accommodation, systems and governance. We have, however, reduced these estimates by 35% to reflect the savings Councils will need to achieve by 2019/20 and which are likely to be in areas identified in our modelling. The transitional costs of the unitary options are similar for either single or two unitary configurations, estimated at circa £25 million. The savings from the exercise will therefore pay back these costs in a short period, albeit that the costs would need to be financed ahead of savings accruing.

It should also be noted that bringing services together under unitary authorities can be expected to present opportunities to remodel services to produce transformational savings that might not otherwise be achievable.

Overall, the Single Unitary option appears to be the most favourable in financial terms over the appraisal period but has a much greater exposure to lost Council Tax income. This is much less of an issue for the next most favourable option which is the Two Unitary Medium Conurbation/Medium Dorset (2b) configuration such that this would actually become the most favourable within a two or three year extension of the current appraisal period.”⁴

3.2 The Next Steps should the recommendation be resolved

Government Approval Process and timeline:

Process	Time
Proposals to Secretary of State	February 2017
Review and cross-Whitehall engagement	February / March 2017
Preliminary decision by Secretary of State and write around to Cabinet colleagues	April 2017
Pre-legislative scrutiny of draft Orders by Joint Committee for Statutory Instrument (JCSI) Lawyers	May 2017

³ Opinion Research Services, (2016). *Dorset’s Councils – Reshaping Your Councils Consultation 2016. Executive Summary*, pg 19

⁴ Local Partnerships, (2016). *Dorset Councils. Potential Options for the Reconfiguration of Local Authorities*. pg3

Seek consent of Councils to making Orders	May/June 2017
Lay Orders in Parliament	June/July 2017
Parliamentary process / Debated and Orders made	By mid-July and before summer recess

3.3 Delivering the Change

A formal programme was created in March 2016 to incorporate the work of Devolution, Combined Authority (CA) and Local Government Reorganisation (LGR) into a single co-ordinated structure, with a programme discipline applied to planning, delivery, interdependencies, risks and reporting. The role of programme Steering Group was undertaken by the Chief Executives Group and the role of Programme Board was undertaken by the Leaders & Chief Executives Group. This approach delivered all work streams on time and is considered to have been a successful first phase. Phase two scoping has been considered by Chief Executives and is shown at Appendix 1.

4. Background

4.1 In December 2015, 8 of the 9 principal Dorset councils resolved the following;

Members authorise the commissioning of Local Partnerships, supported by the Local Government Association (“the LGA”), in conjunction with all principal councils in Dorset, to examine the financial implications of the options outlined in this report for the future of local government in the sub-region.

Members authorise the development of a case for change in conjunction with all principal councils in Dorset, recognising the need to be pro-active in developing new solutions with the opportunity of devolution and the prospect of continuing austerity.

4.2 East Dorset District Council resolved the following in April 2016

The Council supports work to examine options for a unitary Council(s) to deliver services, which are financially viable, recognise the economic geography and meet the aspirations of the communities we serve.

4.3 The rationale for considering change was set out in the December 2015 report and is repeated below;

- Improving and maintaining frontline services through greater capacity
- Providing integrated and consistent leadership across a wider area
- Enabling consistent and efficient service delivery via a joined up approach
- Increasing the economic advantage of the area and creating a more direct and integrated focus on growth and prosperity
- Developing a more business focused Council based on the economic geography of the business community
- Creating a greater strategic presence and influence in the region
- Exploiting commercial opportunities

- Reducing management and overhead costs
- Reducing the costs of public sector provision via economies of scale and transformational change, and facilitating its long-term sustainability
- Avoiding unnecessary competition for key staff and role duplication
- Reducing the complexity of relationships across the wider public sector
- Enabling comprehensive place shaping in the area and therefore providing a catalyst for wider scale public sector reform
- Creating the opportunity for a more significant devolution deal with Government

4.4 The three pieces of commissioned work, the financial analysis, the public consultation and the development of the Case for Change, considered the following options;

- Retaining all councils
- Reducing the current 9 councils to 2 with the following options of which areas the new unitary councils could cover;

Option	Unitary council A	Unitary council B
2a	LARGE CONURBATION: Bournemouth, Christchurch, East Dorset and Poole, plus the services currently provided by Dorset County Council in this area	SMALL DORSET: North Dorset, Purbeck, West Dorset, Weymouth & Portland, plus the services currently provided by Dorset County Council in this area
2b	MEDIUM CONURBATION: Bournemouth, Christchurch and Poole, plus the services currently provided by Dorset County Council in this area	MEDIUM DORSET: East Dorset, North Dorset, Purbeck, West Dorset, Weymouth & Portland, plus the services currently provided by Dorset County Council in this area
2c	SMALL CONURBATION: Bournemouth and Poole	LARGE DORSET: Christchurch, East Dorset, North Dorset, Purbeck, West Dorset, Weymouth & Portland, plus the services currently provided by Dorset County Council in this area

5. Legal

5.1 The Local Government and Public Involvement in Health Act 2007 sets out the procedure for the creation of a unitary authority. Section 15 of the Cities and Local Government Devolution Act 2016 however allows the

Secretary of State to make regulations to modify the procedure where there is consensus between authorities. Where there is not consensus, the Act gives the Secretary of State the power to impose solutions, provided that at least one relevant local authority consents.

5.2 When considering the recommendations and in reaching a decision members should take into account the outcome of the consultation process and the issues raised, as contained in the detailed consultation report December 2016 which was made available to members on the 5th December and can be accessed via the following link www.reshapingyourcouncils.uk.

5.3 Assuming that there is broad consensus, the next step will be to draft the necessary regulations and statutory orders. These will include the regulations modifying the procedural requirements of the 2007 Act and the structural change order dissolving the existing principal councils and establishing the new structure. The drafting will be done by Department of Communities and Local Government (“DCLG”) lawyers in consultation with Dorset Monitoring Officers.

5.4 Once the structural change order has been drafted the final draft order will be considered by each of the principal councils prior to giving their consent to the order being made. It is anticipated that this would take place in early June 2017. Given the powers of the Secretary of State to impose changes the requirement for consent at this stage is largely a legal technicality and not a further opportunity to reconsider the principle of re-organisation. The structural change order and regulations modifying the 2007 Act will then be debated in Parliament and made if Parliament agrees, the order will be made probably before the summer recess.

5.5 Further orders may or may not be required in respect of the transfer of staff, property and other assets, rights and liabilities from the principal authorities to the new unitary authorities. The function of preparing for and facilitating timely transfer would be that an implementation body set up under the structural change order for each unitary authority. The implementation bodies would be made up of representatives from each of the relevant principal councils and continue in place until the first elections to the new unitary authorities in May 2019. It is likely that decisions on the setting up of the implementation bodies would be made at the same meetings at which principal councils consent to the making of the order.

6. Financial

6.1 Despite all councils becoming more efficient and making savings of over £142m since 2010/11 it has been identified that a further £82m would still need to be saved between 2017/18 and 2024/25. Approximately £52m would need to be found before April 2019 with the remaining £30m having to be

found in the period between April 2019 and March 2025. The need for change is therefore critical if current service delivery is to be maintained.

6.2 With this challenge in mind and in order to consider the potential opportunities that might be achieved from reorganising the current local government configuration in Dorset, all Councils commissioned Local Partnerships to undertake a review of the potential costs and savings that might be achieved from a number of unitary options. This work was undertaken in conjunction with all Chief Finance Officers in Dorset who have endorsed their report.

6.3 The executive summary and detailed report of the Local Partnerships work has been issued to members and can be found on the following link www.reshapingyourcouncils.uk and it is not the intention of this section to replicate that information. What the Local Partnerships report does show is that there are likely to be sufficient savings to justify the reduction of 9 councils to 2.

6.4 The Local Partnerships report sets out the assumptions applied to assessing the future funding gaps as well as those applied to identifying the potential savings, costs and harmonising council tax associated with reorganising the current local government structure. Whilst accepting the assumptions used and the methodology for disaggregating costs, the Chief Finance Officers recognise, and would advise members that these assumptions may not necessarily prove to be the case. That said, they consider they are realistic enough and can be used in comparing the relative financial position of one option against another. The Local Partnerships report sets out for each option the total potential surplus that could be achieved for each option in 2024/25, how this is split across each unitary option and also the potential council tax foregone over the harmonisation period.

6.5 The Case for Change which has been compiled by PwC contains the information produced by Local Partnerships regarding the potential savings and costs from reorganisation. In addition, the PwC report also provides an indication, based on their experience elsewhere, of the transformation savings and costs that could also accrue from transforming services during and after the reorganisation. They have shown a base transformation position as well as a stretch target. The potential range of transformation savings and costs identified by PwC, whilst acknowledged by the Chief Finance Officers, have not been endorsed in the same way as the Local Partnerships work has been. However, the base transformation position and the stretch target are considered to offer members a potential scale of savings and costs that might accrue in transforming service delivery through two new unitary councils.

6.6 It is important for members to acknowledge the significance of the potential change for 9 councils to 2 and the financial risk that this will entail. This financial information contained in both the Local Partnerships report and the PwC report are based on assumptions which it is very likely will be subject to change brought about by a number of unforeseen future factors. However,

Chief Finance Officers would advise that the status quo will not help to address the current and future financial challenges, particularly being faced by the upper-tier authorities.

6.7 A resolution to support a submission to the Secretary of State to reduce the number of councils from 9 to 2 will result in significant costs being incurred. Based on the Local Partnerships work the potential cost of reorganisation, not transformation, would be in the region of £25m. It is hoped that some, if not all, of these costs will be met by specific Government grant but the Government has, so far, refused to indicate that grants might be available. Consequently, Dorset Councils need to identify a way of financing these costs.

6.8 Local Partnerships have indicated that the costs of the transitional resources to manage the change will amount to £2.5m. It is proposed to meet these programme and project management costs from the resources of the nine current councils over the next two financial years. The remaining costs of implementing the transition, totalling £22.5m, will start to be incurred in 2018/19 and will be potentially financed from capital resources, as detailed below.

6.9 It is proposed to manage the creation of the two unitaries as one programme, with a number of projects feeding into it. The £2.5m to manage the programme and the projects will include the costs associated with disaggregating the costs, resources, assets and liabilities of the County Council, if option 2a or 2b is preferred and disaggregating the costs of the Christchurch and East Dorset partnership if 2b is preferred. All of these programme and project management costs will be met by the current councils, pro-rata to their populations, with the County Council and the Districts and Boroughs in the two-tier area sharing their costs equally.

Option 2b	Population	Percentage	2017/18 Share £000	2018/19 Share £000	Total Share £000
Bournemouth	194,500	25.40	254.0	381.0	635.0
Poole	150,600	19.67	196.7	295.1	491.8
Dorset County	420,600	27.47	274.7	412.1	686.8
Christchurch	49,100	3.20	32.0	48.0	80.0
East Dorset	88,700	5.79	57.9	86.8	144.7
North Dorset	70,700	4.61	46.1	69.1	115.2
Purbeck	46,200	3.02	30.2	45.3	75.5
West Dorset	100,700	6.58	65.8	98.7	164.5
Weymouth & Portland	65,200	4.26	42.6	63.9	106.5
Total		100.00	1,000	1,500	2,500

6.10 Although the above expenditure would constitute revenue expenditure, councils have the power to meet it from reserves or capital receipts, if they make a prior Council decision to do so.

6.11 The costs of implementing the transition cannot be managed as a single pot. The costs of implementing each unitary council need to be met by the specific unitary to which they relate. However, some costs will be shared, where it is equitable to do so such as redundancy costs in specific cases.

6.12 Local Partnerships have indicated that the costs of implementing the two new unitary councils will be in the order of £22.5m, excluding the costs of managing the programme and projects. Their analysis suggests these costs will be split as £12.6m to form the rural unitary and £9.9m to form the urban unitary. These costs are considered to be the minimum required to implement the reorganisation. The “case for change” prepared by Pricewaterhouse Coopers indicates that the costs of the transformation could rise to £53.7m if the new unitary councils decide to transform the way in which services are delivered at the same time as making the transition; generating savings of up to £66.3 per annum, between the two new unitary councils. The extent of the transformation will be dictated by each new unitary council and, to some extent, by the Implementation Executives which would be formed towards the end of 2017 and is dependent, in part, on their respective risk appetites.

6.13 Chief Finance Officers are aware the costs of implementing the new unitary councils can be financed from capital receipts, using existing legislative provisions. However, they consider the Government should be asked to finance some or all of these costs from grant. The Government should also be asked to issue Capitalisation Directions in respect of the costs of the transition, to the extent that these costs are not financed from grant. A separate application would have to be made on behalf of each of the two new unitary councils. The Capitalisation Directions would allow the costs of the transition to be from borrowing on behalf of each of the new unitary councils. Potentially, some or all of the borrowing could be repaid from the sale of assets because Local Partnerships believe capital receipts of up to £25m could be generated by the ultimate disposal of fixed assets no longer used by the new unitary councils.

7. Equalities

7.1 PricewaterhouseCoopers (PwCs) Case for Change report and Opinion Research Services (ORS) consultation report do not present any issues which would be considered unlawful from an equalities perspective.

7.2 The equalities group have undertaken a very high level assessment of potential equality impacts that might result from adoption of Options 2a, 2b or 2c and again have not identified any issues which would be considered unlawful from an equalities perspective.

7.3 As nothing has been identified as potentially unlawful the equalities duty has been met.

7.4 The full Equality Impact Needs Assessment is attached to this report at Appendix 2.

8. Risks

8.1 Risks associated with this work are being managed by the pan-Dorset programme and councils are working collectively to mitigate risk to an acceptable level. At this stage the most significant risks include:

- Councils are unable to reach agreement on the shape of any new authorities during the cycle of full council meetings in January 2017 and therefore a joint submission cannot be made to Government.

The consequences of this risk should it arise would be that Councils are potentially not able to keep to the proposed timetable and do not meet the deadlines for parliamentary time, having a knock on effect on the time available for implementation should change be supported.

The mitigating measures include that all Dorset councillors have been in receipt of the evidence on which to base their decisions, there has been the opportunity to attend a briefing session delivered by the authors of the reports and a chance to raise technical questions. Also prior to full council consideration there has been a period of time to allow discussions to take place locally and for each council to put in place the necessary democratic arrangements. There has been detailed planning of meeting schedules and a co-ordinated approach to dispatching papers in order to maintain momentum with the timetable proposed by DCLG.

8.2 The pan-Dorset risk register will be refreshed to reflect the most significant risks for the next phase should change be supported. Key risks will include:

- There is not adequate capacity available to deliver the programme as well as maintain business as usual up until go-live

The mitigating measures include the development of a comprehensive resource plan, including people, finance and assets, by the programme team to support work going forward should councils decide to pursue one of the options to change.

8.3 A more detailed review of the high level risks identified with transition are detailed on page 100, figure 45 of PwCs Case for Change report.

Appendix 1

A formal programme was created in March 2016 to incorporate the work of Devolution, Combined Authority (CA) and Local Government Reorganisation (LGR) into a single co-ordinated structure, with a programme discipline applied to planning, delivery, interdependencies, risks and reporting. The role of programme Steering Group was undertaken by the Chief Executives Group and the role of Programme Board was undertaken by the Leaders & Chief Executives Group.

LGR Phase 1 Concept and Approval.

This covered the following principles:

- * Dorset councils agreeing to investigate options for LGR including creating two new unitary councils
- * Financial analysis of the proposed options
- * Public consultation on the proposed options
- * Case for Change analysis of the proposed options based on the government's '5 tests'
- * Dorset councils agreeing a recommendation to submit to Government in February 2017

Phase 2 Purpose and Objectives

The purpose of phase 2 is to manage the LGR proposal from submission to Government through to establishment of the new authorities, including the set up and operation of the Interim Executive Authorities.

The objectives of this phase are to:

- * Ensure the appropriate parliamentary powers are in place and the authorities are set up correctly, with effective governance arrangements
- * To design a comprehensive operating model for the new authorities (one or two, with common elements), with review by Implementation Executive once in place
- * Prepare service and staff transition plans
- * Prepare for a smooth transition and go-live in April 2019
- * Ensure buy-in and engagement from staff, members and other key stakeholders
- * Ensure the governance arrangements incorporate the Combined Authority and devolution proposals

Scope

In Scope

- * Legal set up and governance and democratic arrangements
- * Implementation executive arrangements put in place (both members and senior officers)
- * Staff, member and other stakeholder engagement
- * Service, organisational and staff structures of the new organisations
- * Prepare for disaggregation of county council services (if necessary) and aggregation of district services
- * Prepare transition arrangements including assets, contracts, service delivery
- * Prepare branding, logos, awareness
- * Prepare service user impacts, customer contact
- * Prepare staff transfer arrangements
- * Combined Authority interim structure and other links and dependencies with Combined Authority and Devolution bid
- * Dissolve existing authorities
- * Implementation Executive to be responsible for setting up any new town councils

Out of Scope

- * Responsibilities, decisions and operations of the new authorities
- * Combined Authority operations

Title	Exploring the options for the reorganisation of local authorities in Bournemouth, Poole and Dorset
Service(s) under analysis	All functions and services provided by all nine Dorset councils: Borough of Poole, Bournemouth Borough Council, Christchurch Borough Council, Dorset County Council, East Dorset District Council, North Dorset District Council, , Purbeck District Council, West Dorset District Council and Weymouth and Portland Borough Council.
Lead Responsible Officers	<p>Chief Executives of all nine councils</p> <p>Borough of Poole (BoP) - Andrew Flockhart Bournemouth Borough Council (BBC) - Tony Williams Christchurch and East Dorset Partnership (CEDP) - David McIntosh Dorset County Council (DCC) - Debbie Ward North Dorset District Council, West Dorset District Council and Weymouth & Portland Borough Council (DCP) - Matt Prosser Purbeck District Council (PDC) - Steve Mackenzie</p>
Members of the Assessment Team:	<p>Beverly Elliott – Organisational Development Co-ordinator(CEDP) Daniel Biggs – Strategic Communities and Equalities Officer (BoP) Rebecca Murphy – Research and Policy Officer (DCC) Sam Johnson – Equality and Diversity Manager (BBC) Sue Joyce – General Manager Resources (PDC) Susan Ward-Rice – Community Development Team Leader (DCP)</p>

Date assessment started:	27 th October 2016
Date assessment completed:	15 th December 2016

About the Policy/Service/Project:

<p>Type of policy</p> <p>The potential to re-organise the structure of local government in Dorset will affect all nine existing councils.</p> <p>This Equality Impact Needs Assessment (EINA) considers the high-level equality implications of the 4 potential local government re-organisation options in Dorset that have been subject to consultation. It is for each of the Dorset councils to take strategic policy decisions based on their understanding of the quality and sustainability of each option. This EINA forms part of the evidence pack from which councils will review the considerations that emerge from the public consultation report, financial analysis and wider case for change. If the decision to move to 2 unitary authorities is taken, a change of such magnitude will undoubtedly impact on service delivery and by association impact residents, communities and members of staff. The merits of the various options must pay 'due regard' to the equality impacts of any decision formed as the basis for future public policy.</p> <p>Option 1 has been referred to as the no change option, as the number of councils and the areas covered by them will not change, however, it is clear that this option would also require significant transformational change in order to deliver the level of budget cuts required over the coming years. This EINA has not focused on this option as the existing organisations already have in place their own equality processes and will address each potential policy change as appropriate. At this stage the EINA has focused on Options 2a, 2b and 2c, which have the potential to change the number of councils from 9, down to 2 unitary councils, with resulting changes to the geographical areas covered by the new organisations. The EINA has focused on very high level potential impacts resulting from: the changes to the areas covered by each of the councils, which will change the demographic make up to the communities each unitary will be serving; the potential impact of moving from two tiers of local councils to one; and some potential transformational changes.</p>
<p>Conclusion of this review</p> <p>PWC's case for change report and Opinion Research Services' (ORS) consultation report do not present any issues which would be considered unlawful from an equalities perspective.</p> <p>The equalities group have undertaken a very high level assessment of potential equality impacts that might result from adoption of Options 2a, 2b or 2c and again have not identified any issues which would be considered unlawful from an equalities perspective.</p> <p>As nothing has been identified as potentially unlawful the equalities duty has been met.</p>

What are the aims/objectives of the policy

The proposed options for change to council structures is intended to provide a sustainable model that is most effective to deliver services in line with the reducing funding levels year on year.

The current configuration of councils under a No Change scenario are projected to have aggregate budget gaps in each of the years from 2019/20 to 2024/25 which would require total savings of approximately £30m to be found.

There is the potential to save annually circa £28 million by the creation of two unitary councils.

It should also be noted that bringing services together under unitary authorities can be expected to present opportunities to remodel services to produce transformational savings that might not otherwise be achievable.¹

Four options were considered: Option 1 no change; and Options 2a, 2b, and 2c based on the creation of two unitary councils.

The consultation information produced by ORS sets out the following key features of each option

Option 1 – No change

This option does not require an EINA as it will not result in any changes to existing policies as an immediate outcome to the decision about the future shape of local government in Dorset.

Option 2A – Large Conurbation (LC)²

KEY FEATURES:

- This option would provide a total contribution of £39.6 million towards meeting the 6 year cumulative funding gap by 2024/25, providing £62.9 million for the Large Conurbation's 6 year cumulative budget gap but creating a £23.3 million deficit in the Small Dorset's 6 year cumulative budget.
- A large urban unitary council would be financially viable, with a high national profile, however there may be significant challenges to the Small Dorset unitary council.
- The population in the Small Dorset unitary (286,400) is lower than the government guidelines (400,000 to 600,000) for an efficiently-functioning unitary council.
- There is a one-off complexity and cost involved in separating and transferring services currently provided by Dorset County Council in Christchurch and East Dorset to the Large Conurbation.

Option 2B – Medium Conurbation (MC)

KEY FEATURES:

¹ 2016: Potential options for the reconfiguration of local authorities - Financial analysis

² Reshaping your councils survey <https://www.ors.org.uk/web/upload/surveys/333423/files/Reshaping%20your%20councils%20PRINT%20no%20crop.pdf>

- This option would provide a total contribution of £46.7 million towards meeting the 6 year cumulative funding gap by 2024/25, providing £45.3 million for the Medium Conurbation’s 6 year cumulative budget gap and £1.4 million for the Medium Dorset’s 6 year cumulative budget.
- Of the various two-unitary options this is the option that is most financially beneficial.
- Most of Dorset’s urban and suburban areas are served by one council, with the largely rural area served by another council.
- This option potentially provides the most effective and efficient way to deliver services for the future.
- This option has the most balanced population split of the three options.
- A medium-sized urban unitary council would have a profile nationally.
- There is a one off complexity and cost involved in separating and transferring services currently provided by Dorset County Council in Christchurch to the Medium Conurbation and for East Dorset District Council and Christchurch Borough Council in separating and transferring services currently provided jointly between the Medium Dorset and the Medium Conurbation.

Option 2C – Small Conurbation (SC)

KEY FEATURES:

- This option would provide a total contribution of £32.8 million towards meeting the 6 year cumulative funding gap by 2024/25, providing £18.7 million for the Small Conurbation’s 6 year cumulative budget gap and £14.1 million for the Large Dorset’s 6 year cumulative budget.
- It makes the least savings overall, of the three two-unitary council options.
- The savings made are most evenly split across the two unitary councils.
- The services currently provided by Dorset County Council remain with the Large Dorset unitary council — there is no separation work required, but services provided by the district, borough and county councils would need to be integrated into the new unitary council.

Associated services, policies and procedures

If a decision is taken to restructure from 9 councils to 2 unitary councils in Dorset, existing policies of all the nine councils in Dorset will potentially be replaced by the policies of the new authorities created from re-organisation.

The reshaping of councils in Dorset has the potential to impact all residents, service users, staff, councillors and visitors

All businesses, statutory, voluntary and community organisations could also be impacted by the reorganisation of Dorset’s councils

Consultation:

Public consultation on the proposals for change started on 30 August and closed on 25 October 2016. This consultation was available to the public, staff and organisations. ORS was appointed by Dorset's councils to provide an independent report of the formal programme of work that forms part of the Reshaping your Councils consultation on the possible reconfiguration of council services in Dorset. The document [dorset-councils-ors-on-interpreting-the-consultation-findings](#) summarises ORS's approach in that role.³

In the Reshaping your Councils consultation ORS looked to capture a range of different responses from individuals and organisations as a result of the following activities:

- The Open Consultation Questionnaire available on-line, with paper copies in council reception areas, local libraries and on road shows;
- The Household Postal Survey;
- A town and parish council survey;
- Resident forums recruited and facilitated by ORS in each of the local authority areas in Dorset;
- 16 facilitated workshops with residents, business and voluntary sector representatives and parish/town councillors;
- 42 roadshows held across Dorset at different times of the day and different days of the week, including Saturdays, staffed by councillors, communications staff, finance staff and other senior staff; and
- Written responses and petitions.

The household survey was sent to a representative sample of the Dorset population. 20,000 addresses were selected at random from all addresses in each of Dorset's local authority areas. **4,258** residents responded (5% online and 95% postal). The household survey responses have been statistically weighted to take account of the size of the population in each local authority area and different response rates for different types of households. This ensures that the household survey results are statistically reliable and representative of the whole population in each area.

The open consultation questionnaire gave all Dorset residents and other stakeholders the chance to have their say; and a total of **12,536** responses were received (85% online and 15% postal).

From the household survey and the open consultation questionnaire a total of **16,794** responses were received.

ORS have prepared an independent analysis taking into account all of the responses and the report was available from 5th December 2016. ORS set out to highlight findings, for example where they may be:

- Relevant;
- Well evidenced;
- Representative of the general population or specific localities;

³ <https://news.dorsetforyou.gov.uk/reshapingyourcouncils/>

- Deliberative – based on thoughtful discussion in public meetings and other informed dialogue;
- Focused on views from under-represented people or equality groups; and
- ‘Novel’ – in the sense of raising ‘different’ issues to those being repeated by a number of respondents or arising from a different perspective.

ORS also aimed to identify where strength of feeling may be particularly intense while recognising that interpreting consultation is not simply a matter of ‘counting heads’, representation of response would be considered when drawing conclusions.

A review of the ORS report indicates that the consultation appears to have been thorough. Whilst it did not collect data on all protected characteristics it did not appear to actively exclude any. Data on equalities is clearly presented and responses appear to be presented neutrally.

Monitoring and Research:

External View

Independent consultants were commissioned by the nine Dorset councils to carry out a set of assessments of the four options being considered to help inform Dorset councillors in their decision-making

- Dorset Councils Local Partnerships - Independent Financial Analysis: published 24th August 2016
- Opinion Research Services - Consultation Report: published on 5th December 2016
- PricewaterhouseCoopers – Case for Change (Appraisal of options): published on 5th December 2016

To further inform the Dorset councillors, the EINA team have put together Appendix 3 – Census data factsheet on the options for reshaping your councils to provide base data on the demographic profiles of the four options. This data is summarised in Appendix 1 Demographic Profiles by Option.

Both documents will form the foundation of future EINAs.

The Census Factsheet shows the demographic distribution of the following indicators across the four options:

- Age profile
- Household type
- Ethnicity
- Religion

- Health/ Disability
- Economic Activity
- Education levels
- Profession levels

If a decision is made to create two new unitary councils in Dorset EINAs will be undertaken where necessary to identify the impact of the changes on: service users; residents; and those with protected characteristics. This will enable consideration to be given to ways of removing or mitigating the negative impacts.

None of the information presented by the external consultants or from the work undertaken by the equalities group present any issues which would be considered unlawful from an equalities perspective.

Internal View

Human Resources teams in all councils will hold data about their staff. This data will need to be pooled should the new organisations be created and will be needed to identify the potential impact on any particular staff groups. Completion of full EINAs will help management document and highlight the impacts of any proposed changes and help in formulating final proposals which seek outcomes that avoid, minimise or mitigate the impacts identified.

Assessing the Impact

The main driver for consideration of unitary councils across Dorset is the continuing significant reductions in available funding to deliver frontline services. It is anticipated that the introduction of unitary councils will reduce costs and improve efficiencies, particularly in respect of back office services, to help protect the continued delivery of frontline services. It is also anticipated that the creation of unitary councils will provide opportunities to innovate in the future delivery of services.

Until any new councils are defined it is impossible to assess the impact of change as it is not known which services will be affected and when and how they will change. However, it is possible to identify some potential, high level, general impacts on groups with protected characteristics and a table of these, analysed by protective characteristic, is attached as Appendix 2. This has not identified any potential issues that could be unlawful from an equalities perspective.

PWC's Case for Change report and Opinion Research Services' (ORS) consultation report do not present any issues which would be considered unlawful from an equalities perspective.

Next steps

If new councils are formed, as new policies and changes in service delivery are considered, further detailed EINAs are required to be undertaken to identify the potential impacts on those with protected characteristics and seek to mitigate any issues, if possible. In due course when more detail about proposed changes is known it will also be possible to assess the cumulative impact where people fall into more than one protected characteristic – age, disability, etc.

Appendix 1 – Demographic Profiles by Option

Protective characteristic	2a		2b		2c	
	Large Conurbation	Small Dorset	Medium Conurbation	Medium Dorset	Small Conurbation	Large Rural
Age <i>(ONS⁴ Mid-Year Estimate 2015)</i>	Distribution of the 185,580 residents aged 65+ (24% in total)					
	65+ 110,646 (23%) 85+ 18,175 (4%)	65+ 74,927 (26%) 85+ 10,569 (3%)	65+ 83,411 (21%) 85+ 13,916 (4%)	65+ 102,162 (27%) 85+ 14,828 (4%)	65+ 68,003 (20%) 85+ 11,342 (3%)	65+ 117,570 (28%) 85+ 17,402 (4%)
Disability <i>Dept. of Work and Pensions Nov. 2015 DLA⁵ and AA⁶</i>	Distribution of the 52,220 people with disabilities and % of population (7% in total)					
	31,380 (6%)	20,840 (7%)	25,640 (7%)	26,580 (7%)	21,600 (6%)	30,620 (7%)
Gender <i>(ONS Mid-Year Estimate 2015)</i>	No major differences across the options					
	Slightly higher proportion of females for Large Conurbation than any of the other options for the conurbation.	All Dorset gender proportions are very similar.	Similar proportion of females for medium and small conurbations	All Dorset gender proportions are very similar.	Similar proportion of females for medium and small conurbations	All Dorset gender proportions are very similar.
Gender reassignment	No data

Appendix 2 A high level assessment of the potential impact

⁷ Black and minority ethnic⁸ Council Tax Benefit

Protected characteristic	Context	Actual or potential positive benefit	Actual or potential negative benefit
All protected characteristics	Creating new unitary organisations changes the geographical boundaries for the delivery of future services in Dorset.	Changes the profile of service users which may facilitate a greater focus and support for those with protected characteristics if their numbers are greater.	Changes the profile of service users, which may have implications for the sustainability of the services to those with protected characteristics, particularly if their numbers are significantly reduced, risking marginalisation.
	Larger local authority organisations.	Reducing the cost of back office and support services to protect frontline services.	
		Easier for community and focus groups to engage with the new, fewer, larger councils.	
		Staff drawn from a wider community may lead to a workforce more representative of the community it serves and customers with protected characteristics may benefit from this diversity.	Possible changes in funding for voluntary and community organisations that support people with protected characteristics
			May lead to a greater sense of remoteness for customers, in particular, those with protected characteristics.
		Potential for increased, dedicated, equality resources to help support the organisations comply with equalities legislation as they grow and evolve. This should help improve the quality and equality of the services provided to benefit all those with protected characteristics	

Protected characteristic	Context	Actual or potential positive benefit	Actual or potential negative benefit
		within the community and employed by the organisations.	
	All "Dorset" options bring together upper and lower tier services.	This should lead to more joined up service provision across the range of local authority services provided to customers with protected characteristics, which may improve the service to these customers. People with protected characteristics may be able to access services easier as there will be one point of contact, not two councils providing different services.	
	Conurbation options 2a and 2b bring together upper and lower tier services in the former lower tier areas.	This should lead to more joined up service provision across the range of local authority services provided to customers with protected characteristics in the former lower tier areas.	
Age	Options 2a, 2b and 2c change the distribution of the elderly (29% of population) between the potential new unitary councils.		The conurbation varies between 79,000 and 129,000, whilst "Dorset" is between 85,000 and 135,000. Increased numbers could impact on the ability of new organisations to deliver effective services to older people. Services would include: social care, benefits, transport etc.
	Further investment in digitisation of services.	Being able to access services from home may make access to services easier for people aged 65+ who have difficulty getting to council offices.	People aged 65+ may struggle to engage with digital services making it harder to access services, especially if there are less council offices/hubs.

Protected characteristic	Context	Actual or potential positive benefit	Actual or potential negative benefit
	Rationalisation of assets leading to fewer buildings and reduced access to services through council offices/hubs.		People aged 65+ may struggle to access services if council offices/hubs are reduced in number e.g. increased travel time and lack of public transport in rural areas.
	Rationalisation of staffing.		Reductions in senior staff may impact older staff disproportionately.
Disability	Options 2a, 2b and 2c change the distribution of the 7% disabled population between the potential new unitary councils.		The conurbation varies between 22,000 and 31,000, and "Dorset" is between 21,000 and 31,000. This increase in the number could impact on the ability of the new organisations to deliver effective services to disabled people. These services would include: social care, benefits, transport etc.
	Further investment in digitisation of services.	Being able to access services from home may make access to services easier for people with disabilities who have difficulty getting to council offices.	People with disabilities may struggle to engage with digital services making it harder for them to access services, especially if council offices/hubs are reduced in number.
	Rationalisation of assets leading to fewer buildings and reduced access to services through council offices/hubs.		People with disabilities may struggle to access services if there are less council offices/hubs.
Gender	For the community, at this stage of the proposals, it is not possible to identify any potential positive or negative impacts to this specific protected characteristic.		
	Rationalisation of staffing.		Reductions in staff could

Protected characteristic	Context	Actual or potential positive benefit	Actual or potential negative benefit
			disproportionately impact females.
	Rationalisation of assets leading to fewer buildings.	A change in centre of duty may reduce travelling time for some staff, helping carers, who tend to be female.	A change in centre of duty may disproportionately affect female staff who tend to be carers and have family commitments.
		Increase flexible working may lead to more home working which may help female members of staff who tend to be carers.	
Gender reassignment	At this stage of the proposals, it is not possible to identify any potential positive or negative impacts to this specific protected characteristic within the community.		
Pregnancy and maternity	At this stage of the proposals, it is not possible to identify any potential positive or negative impacts to this specific protected characteristic within the community.		
	Rationalisation of assets leading to fewer buildings.	Increase flexible working may lead to more home working which may help female members of staff stay in work after having children.	
Marriage and civil partnerships	At this stage of the proposals, it is not possible to identify any potential positive or negative impacts to this specific protected characteristic within the community.		

Protected characteristic	Context	Actual or potential positive benefit	Actual or potential negative benefit
Race	Majority of the 60,241 (69%) of BME people live in Bournemouth and Poole.	Bringing these areas together would allow for a greater focus on BME groups. Options 2a, 2b and 2c support this.	Bringing these areas together may leave BME population more marginalised. Affected by options 2a, 2b and 2c.
Religion or belief	496,000 people expressed a religious faith and represent 65% of the population of Dorset. Under options 2a, 2b and 2c this group is sufficiently large that its distribution is between 62% and 68% of the new unitary populations and so there is unlikely to be any significant impact on this group as a whole. Further analysis would be required for the sub groups.		
Sexual orientation	The majority of same sex marriages and civil partnerships are in Bournemouth and Poole.	Bringing these areas together would allow greater support for these people. Options 2a, 2b and 2c support this.	
Deprivation	Options 2a, 2b and 2c change the distribution of the 124,000 (17%) people on council tax benefit between the potential new unitary councils.		The conurbation varies between 63,000 and 81,000, whilst for "Dorset" is between 44,000 and 61,000. This could impact on the ability of the new organisations to deliver effective services to help poorer families and members of the community.
	Further investment in digitisation of services.	Being able to access services from home may make access to services easier for people on benefit who may have difficulty meeting the cost of getting to council offices.	People on benefit may struggle to engage with digital services making it harder to make claims and access services, especially if council offices/hubs are reduced in number.
	Rationalisation of assets leading to fewer buildings and reduced access to services through council offices/hubs.		People on benefit may struggle to access services if there are less council offices/hubs, making them less accessible and more costly to get to.

Protected characteristic	Context	Actual or potential positive benefit	Actual or potential negative benefit
Rurality	Options 2a, 2b and 2c change the distribution of the 169,000 (23%) rural population between the potential new unitary councils.	For “Dorset” this varies between 147,000 (53%) of the population and 169,000 (41%) of the population. At around half of the total population in all options, means that there can be more focus on rural community issues.	For the conurbation this varies between 375 and 22,000. Option 2b only increases the rural population from 375 to 1,044, so will have a minimal effect, although rural interests are likely to be marginalised. Option 2a could result in greater isolation of a larger proportion of the rural communities in the lower tier areas included within the conurbation.
	Further investment in digitisation of services.	Being able to access services from home may make access to services easier for people in rural communities who have difficulty getting to council offices, particularly with the lack of public transport.	People in rural communities may struggle to engage with digital services making it harder for them to access services, especially if council offices/hubs are reduced in number.
	Rationalisation of assets leading to fewer buildings and reduced access to services through council offices/hubs.		People in rural communities may find it even harder, or more expensive, to access services if council offices/hubs are reduced in number.

Explanatory Notes

Population totals may differ due to different population base (check age groups included).

Communal Establishment residents excludes staff and their families.

A dependent child is any person aged 0 to 15 in a household (whether or not in a family) or a person aged 16 to 18 in full-time education and living in a family with his or her parent(s) or grandparent(s). It does not include any people aged 16 to 18 who have a spouse, partner or child living in the household.

Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2011 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade. Each individual aged 16 or over is assigned the approximated social grade of their Household Reference Person, according to standard market research practice.

The age range for this table has been restricted to 16 to 64. The approximated social grade algorithm used in the census produces results for this age range that are consistent with those from other data sources. The information collected in the census produces less accurate results for those outside of this age range and therefore will not be made available.

- No Qualifications: No academic or professional qualifications
- Level 1 qualifications: 1-4 O Levels/CSE/GCSEs (any grades), Entry Level, Foundation Diploma, NVQ level 1, Foundation GNVQ, Basic/Essential Skills
- Level 2 qualifications: 5+ O Level (Passes)/CSEs (Grade 1)/GCSEs (Grades A*-C), School Certificate, 1 A Level/ 2-3 AS Levels/VCEs, Intermediate/Higher Diploma, Welsh Baccalaureate Intermediate Diploma, NVQ level 2, Intermediate GNVQ, City and Guilds Craft, BTEC First/General Diploma, RSA Diploma
- Apprenticeship
- Level 3 qualifications: 2+ A Levels/VCEs, 4+ AS Levels, Higher School Certificate, Progression/Advanced Diploma, Welsh Baccalaureate Advanced Diploma, NVQ Level 3; Advanced GNVQ, City and Guilds Advanced Craft, ONC, OND, BTEC National, RSA Advanced Diploma
- Level 4+ qualifications: Degree (for example BA, BSc), Higher Degree (for example MA, PhD, PGCE), NVQ Level 4-5, HNC, HND, RSA Higher Diploma, BTEC Higher level, Foundation degree (NI), Professional qualifications (for example teaching, nursing, accountancy)
- Other qualifications: Vocational/Work-related Qualifications, Foreign Qualifications (Not stated/ level unknown).

HRP Household Representative Person

** Department of Work & Pensions February 2016 (Based on 5% Sample)

The final three sections are supplied by DCC. These look at:

Disability - The data set measures the number of people that were claiming attendance allowance and disability living allowance as of February 2016. This data set is a 5% sample set but gives a good indication of those who are considered to be suffering from a disability under the age of 65 (Disability Living Allowance) and those aged 65+ who have disability (Attendance Allowance).

Rurality - This is based on data from the ONS Census 2011 and considers the population that live in areas deemed to be either **urban** or **rural** based on the density of population and spatial distribution.

Deprivation - The data set from the Department of Work and Pensions considers **deprivation** and this data set looks at those in receipt of council tax benefit in March 2013 as a proxy for low income. The data set considers the claimants, their partners and dependents and together

Weymouth and Portland – Key Results

Consultation Questionnaire and Household Survey Results ^[1]

This area summary report is provided for convenience and should be read in conjunction with the full report and executive summary.

To what extent do you agree or disagree ...

	... that Dorset's councils should focus on cutting out duplication and reducing administration costs wherever possible?			... with the proposal to replace the NINE existing councils (option 1) with TWO new councils (options 2a– 2c) in order to protect services as far as possible? ^[2]		
Open questionnaire	92%	4%	4%	78%	5%	16%
Representative Household Survey	87%	8%	5%	70%	12%	16%
	Agree	Neither	Disagree	Agree	Neither	Disagree

Please rate how important you think each of these criteria are where "10" means that the criteria is critically important and "0" means the criteria is of no importance.

Criterion	Open Questionnaire		Household Survey	
	Rank	Overall average score (out of 10)	Rank	Overall average score (out of 10)
Accountability	2=	9.0	2=	8.8
Quality	2=	9.0	1	9.0
Local Identity	5	7.5	5	7.7
Access	4	8.2	4	7.9
Value For Money	1	9.1	2=	8.8

If two new councils were created, to what extent do you support or oppose each of the possible options that are being considered? ^[2]

	Option 2A				Option 2B				Option 2C			
	Open Questionnaire	33%	12%	47%	-14	55%	12%	28%	+27	36%	13%	43%
Representative Household Survey	35%	20%	31%	+4	54%	16%	21%	+33	31%	16%	41%	-10
	Support	Neither	Oppose	Net	Support	Neither	Oppose	Net	Support	Neither	Oppose	Net

¹ The results above include all individuals who indicated that they lived in Weymouth and Portland and made responses to the relevant questions. This includes 700 respondents from the open questionnaire and 391 residents in the household survey.

² The proportion whose views are unknown for a specific option but who gave a valid response to at least one of the proposed options (option 1, option 2a, 2b or 2c) are included in the base but are not shown in tables. As a result, these percentages will not sum to 100%.

Further Comments ^[3]

All percentages shown are of those who gave further comments. Each individual may have made comments about multiple topics, so results will not sum to 100%.

Coded comment	Open Questionnaire	Representative Household Survey
	% of respondents who made comment	% of residents who made comment
Alternatives: one large unitary authority preferred/worked for Wiltshire/most cost-effective	16%	9%
Other comments: comments relating to town and parish councils (including comments about Weymouth getting a Town Council)	12%	2%
Concern about and opposition to general proposal: loss of local identity/links with local communities must be maintained/every area has different needs	11%	12%
Concern about and opposition to general proposal: loss of access/concern about loss of local services/urban areas will be prioritised over rural ones	9%	17%
Other comments: general criticism of consultation	8%	7%
Alternatives: infrequently suggested alternative proposals/other suggestions	7%	6%
Alternatives: reduce high salaries/managers and councillors should take pay cuts/pension cuts/fewer expenses/disagree with big redundancy packages	7%	8%
Other comments: need more information to make decision (e.g. need to see a business plan)	7%	2%
Concern and opposition about general proposal: loss of accountability/less direct involvement for people/more bureaucracy	7%	14%
Criticism of/issues with current situation: negative comments about current council/specific councils	7%	14%

Deliberative Workshops

This workshop took place on 21st September and had 16 attendees.

CRITERIA	AVERAGE RANK
Accountability	2
Quality of Services	4
Local Identity	5
Access	1
Value For Money	3
