

## **Appendix 6: Annex 2 – Green Infrastructure Network**

The green infrastructure network as set out in Policy ENV 4 in the Preferred Options document is made up of a number of different sites. These sites are shown on the map below.

The boundaries of these sites will be reviewed for inclusion in the submission version of the local plan policies map. This review will take into account current and proposed development sites along with an assessment of the areas contribution to the network. New areas may be added and areas may be removed.
