Hi Kathryn

Thank you for advising us of the above application. As a designated responsible authority Environmental Health have considered the application in respect of potential noise nuisance from the premises.

Should the premises licence be granted, appropriate conditions will be required to mitigate noise disturbance to the local community. The applicant has considered this and offered conditions within the application.

I have liaised with the applicant and we have agreed an amendment to the noise limiting device condition proposed and additional conditions to manage potential noise from the proposed smoking area at the front of the premises. The applicant has amended the attached plan to show where they propose to locate a smoking area.

Environmental Health have no objection to the application subject to the prevention of public nuisance conditions offered in the application with amendments as follows:

A noise limiter shall be fitted to the musical amplification system set at a level determined by and to the satisfaction of an authorised officer of the Environmental Health Service, so as to ensure that no noise nuisance is caused to local residents or businesses. The operational panel of the noise limiter shall then be secured by key or password to the satisfaction of officers from the Environmental Health Service and access shall only be by persons authorised by the Premises Licence holder. The limiter shall not be altered without prior agreement with the Environmental Health Service. No alteration or modification to any existing sound system(s) should be effected without prior knowledge of an authorised Officer of the Environmental Health Service. No additional sound generating equipment shall be used on the premises without being routed through the sound limiter device.

The cordoned off designated smoking area outside the front of the premises shall be supervised and will be limited to no more than 15 patrons at any given time.

The smoking area shall close 45minutes before the termination of licensable activities.

Kind regards

Louise Joyner
