

## **Family Hub Network Development – Additional Information requested by the People and Health Overview Committee**

The family hub networks points identified in appendix 1 of the Family Hub Network Development report represent the sites currently identified and we will continue to grow this list as we develop the partnership model.

We have identified our main Family Hub sites. However, we are placing emphasis on developing a Family Hub Network, with main sites supplemented by associated community outreach points, with development aligned to our locality model.

Dorset's Strategic Alliance for Children and Young People provides the strategic direction for Dorset's Family Hubs, with local oversight arrangements via the partnership Local Alliance Groups (LAGs), at a locality level.

Local Alliance Groups enable partners from across a range of organisations (statutory, voluntary and community) to contribute to the development and ongoing delivery of Family Hubs at a locality level and through these forums we are working with partners to identify potential Family Hub network points.

It is acknowledged that some of the spaces identified will require investment to ensure that they are fit for purpose and provide inviting and accessible environments.
